

**MSSMegaPro Studio GMGS** , is a compressed soundfont in proprietary "sfkr" format. Professionally created with the help of "Musicians for all musicians". The newly created soundfont was created thanks to meticulous web searches for excellent copyright-free samples. We also used samples produced by our collaborators and various sf2s regularly purchased with authorization for use by the manufacturer. With this latest work, we have reduced the GS instruments little used in midi bases and from almost all musical genres, to give greater quality to the most used instruments in the 128 GM presets. Furthermore, the main kits drums (2 standard, 1 Room, 1 Power, 1 Brush, 1 Jazz, 1 Rock) have tried to improve their quality by using samples from the best brands of drums and cymbals.

## Features:

- GM + GS "sfkr" format
- 700 MB of unzipped space
- 128 GM Presets
- 130 GS Presets + 3 SFX
- 014 GM Drum and Percussion Set
- Windows environment
